

The Mobile Connectivity ROI Index

Manufacturing and Logistics

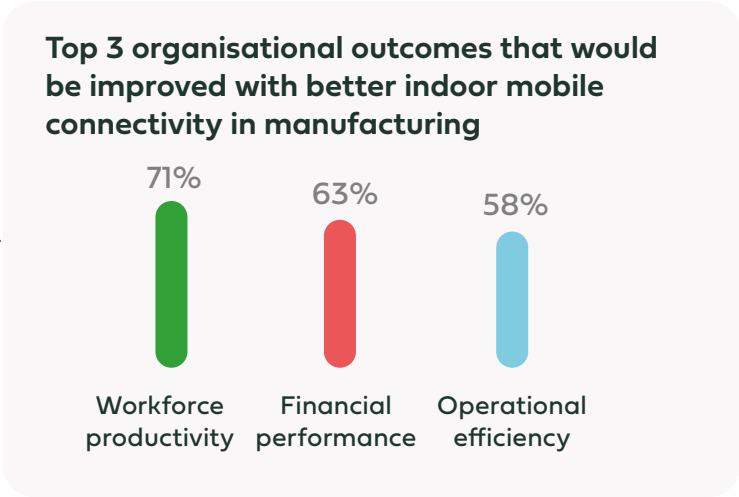

We surveyed 100 senior executives from medium and large organisations across manufacturing and logistics to understand their perspective on what dedicated mobile connectivity adds to the sector.

They reported better indoor mobile coverage would bring

+£3.2BN

in productivity gains to the manufacturing sector.

68% of business leaders said real time tracking and monitoring of goods, assets and employees: the no.1 digital transformation activity driving demand for better mobile signal.

“The size of our premises causes low quality connectivity in farthest parts.”

– Senior ITDM in Manufacturing, South East
